

What does a vaccine do?

Your body has cells that help you stay healthy.

But the coronavirus will try to sneak into your body and make you feel bad!

The vaccine teaches your cells what the coronavirus looks like.

Now your cells can recognize the virus and help stop it from hurting you!

Your body has protection against getting very sick from the virus. The vaccine has done its job and leaves your body!

To sign a child up for a vaccine, visit vaccinenm.org/kids
